DETAILED ACTION

1. The following is a Final Office action in response to communications received on 06/19/2008. Claim1 has been amended, and is addressed in the action below.

Response to Amendment

2. Applicant's amendment to the specification is sufficient to overcome the objection set forth in the previous action.

Priority

3. The applicant claims priority from application (**2003/5348**), but has submitted a certified copy of application (**2003/5246**). It appears that the applicant has erroneously claimed priority from application (**2003/5348**) instead of properly claiming priority from application (**2003/5246**). Applicant will be unable to receive the benefit of the claimed priority until this problem is corrected.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3714

5. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent Application No: US 2002/0164561 to Joffe (Joffe), in view of US Patent No: US 6,565,609 to Sorge et al. (Sorge).

In reference to Claim 1

Joffe teaches a method of teaching accounting principles comprising:

using question sets to distinguish assets, liabilities, income and expenditure from one another to facilitate proper treatment of said assets, liabilities, income and expenditure in books of account (abstract), and

using words other than commonly accepted accounting words to denote accounting concepts (Figure 7b).

Joffe, however, fails to specifically teach that a first color is used to represent a positive financial transaction value and a second color is used to represent a negative financial transaction value.

Sorge teaches that a first color is used to represent a positive financial transaction value and a second color is used to represent a negative financial transaction value (col. 14, ll. 66-67 to col. 15, ll. 1-5).

It would have been obvious to one of ordinary skill in the art, at the time of the invention, to have combined the teachings of Joffe and Sorge, to have supplemented the color-coding of Joffe to have included the color-coding of financial transaction values, in order to provide a user with a visual depiction of the value of a transaction.

Response to Arguments

6. Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
